Fáilte ar ais arís gach duine, tar éis na laethanta saoire. Welcome back one and all after the summer break. A particular welcome to our 36 new Junior Infants who started yesterday.

Welcome also to the other children who joined the school in other classes. I hope that they all have many a happy year here in Scoil

Mhuire Allenwood. Tá súil agam go mbeidh bliain iontach eile againn arís i mbliana.

ALLENWOOD CAMPUS COMMUNITY DAY

See attached flyer for the Allenwood Campus Community Day which takes place on September 5th.

This family friendly day will have a range of activities and entertainment for young and old.

SUMMER JOBS

There was a lot of work done in the school over the past few months most notably the installation of a new modular building which accomodates one of our 6th classes.

We also had the bathrooms in the back building completely rennovated as well as installing solar panels on the front building.

PLANNING PERMISSION

I'm delighted to say that Planning Permission for our 2 story, 995m2 expansion and relocation of Astro pitch has been approved by Kildare County Council, subject to conditions. Hopefully we will be close to tendering in the coming months.

ALLERGIES

We have some students joining our school this year with severe nut allergies. Our school is a nut free zone so please bear that in mind when preparing and providing lunches this year. We also encourage children not to share their food. See attached letter for further information

HOT SCHOOL MEALS

Hot school meals are back up and running. Unfortunately the volume of waste is extremely high and we would like to tighten up on this.

Please remember to cancel your child's order if they do not like the lunches or discuss with them which lunches they will eat.

SOLAR PANELS

Scoil Mhuire Allenwood would like to thank BnM and ESB joint venture Timahoe North Solar Farm t/a Sundew Solar DAC for the funding received through the Timahoe North Solar Farm Community Benefit Fund for the installation of 14 new solar panels on the front building.

This will be of great assistance towards reducing our Carbon footprint as well as running costs of our school.
